Red Line

Compressed air at your service

Compressed air at your service

Introduction

Our Red Line products have been created for everyone who looks for a simple but reliable compressed air solution.

The compressors in this range are designed to meet basic air requirements, while keeping a close eye on quality and performance.

Applications

The main Red Line applications are related to DIY and semi-professional jobs in or around the house. Amongst other tasks, this includes blowing, inflating, airbrushing, wrenching, stapling and painting.

Benefits

- Safe and reliable
- Simple and user-friendly
- Flexibility to move around
- Plug in to your normal domestic electrical supply
